

HeliaRISE®

SHADING SYSTEMS

THE
DAWNING
OF A NEW REVOLUTION

Presenting HeliaRISE®

SHADING SYSTEMS

THE HEIGHT OF AESTHETIC PERFORMANCE

Inspired by and named for the children of the Sun God, HeliaRISE® takes premier manual window shading systems to their highest expression of form, fit, and function. No other product available today combines more beauty and efficiency in one innovative, ultra-customizable system. Presenting HeliaRISE: the dawning of a new revolution in manual window shading systems.

THE BEAUTY OF INNOVATION

HeliaRISE® is a product of artistic craftsmanship, ideal for the demanding architect looking to manage natural daylight with an elegant and reliable energy-saving solution. Available in three basic sizes that can easily and conveniently be customized to fit varying dimensions and applications, these highly adaptable shading systems can be specified for a single room or across an entire property. In addition, since HeliaRISE systems are available with your favorite solar-fabric brands, including EcoFabrix® and Mermet®, finding the perfect fabric is always a breeze.

HeliaRISE® is conveniently handmade right here in the U.S. This means virtually any variation in color, size, and accessory choice can be accommodated cost-effectively, enabling the architect to achieve a truly personalized look while adding no extra time to the project. WT Shade® also offers a host of drawings, specifications, samples, and other resources to assist during a project's drafting phases, design presentation, and installation.

A SHADE ABOVE

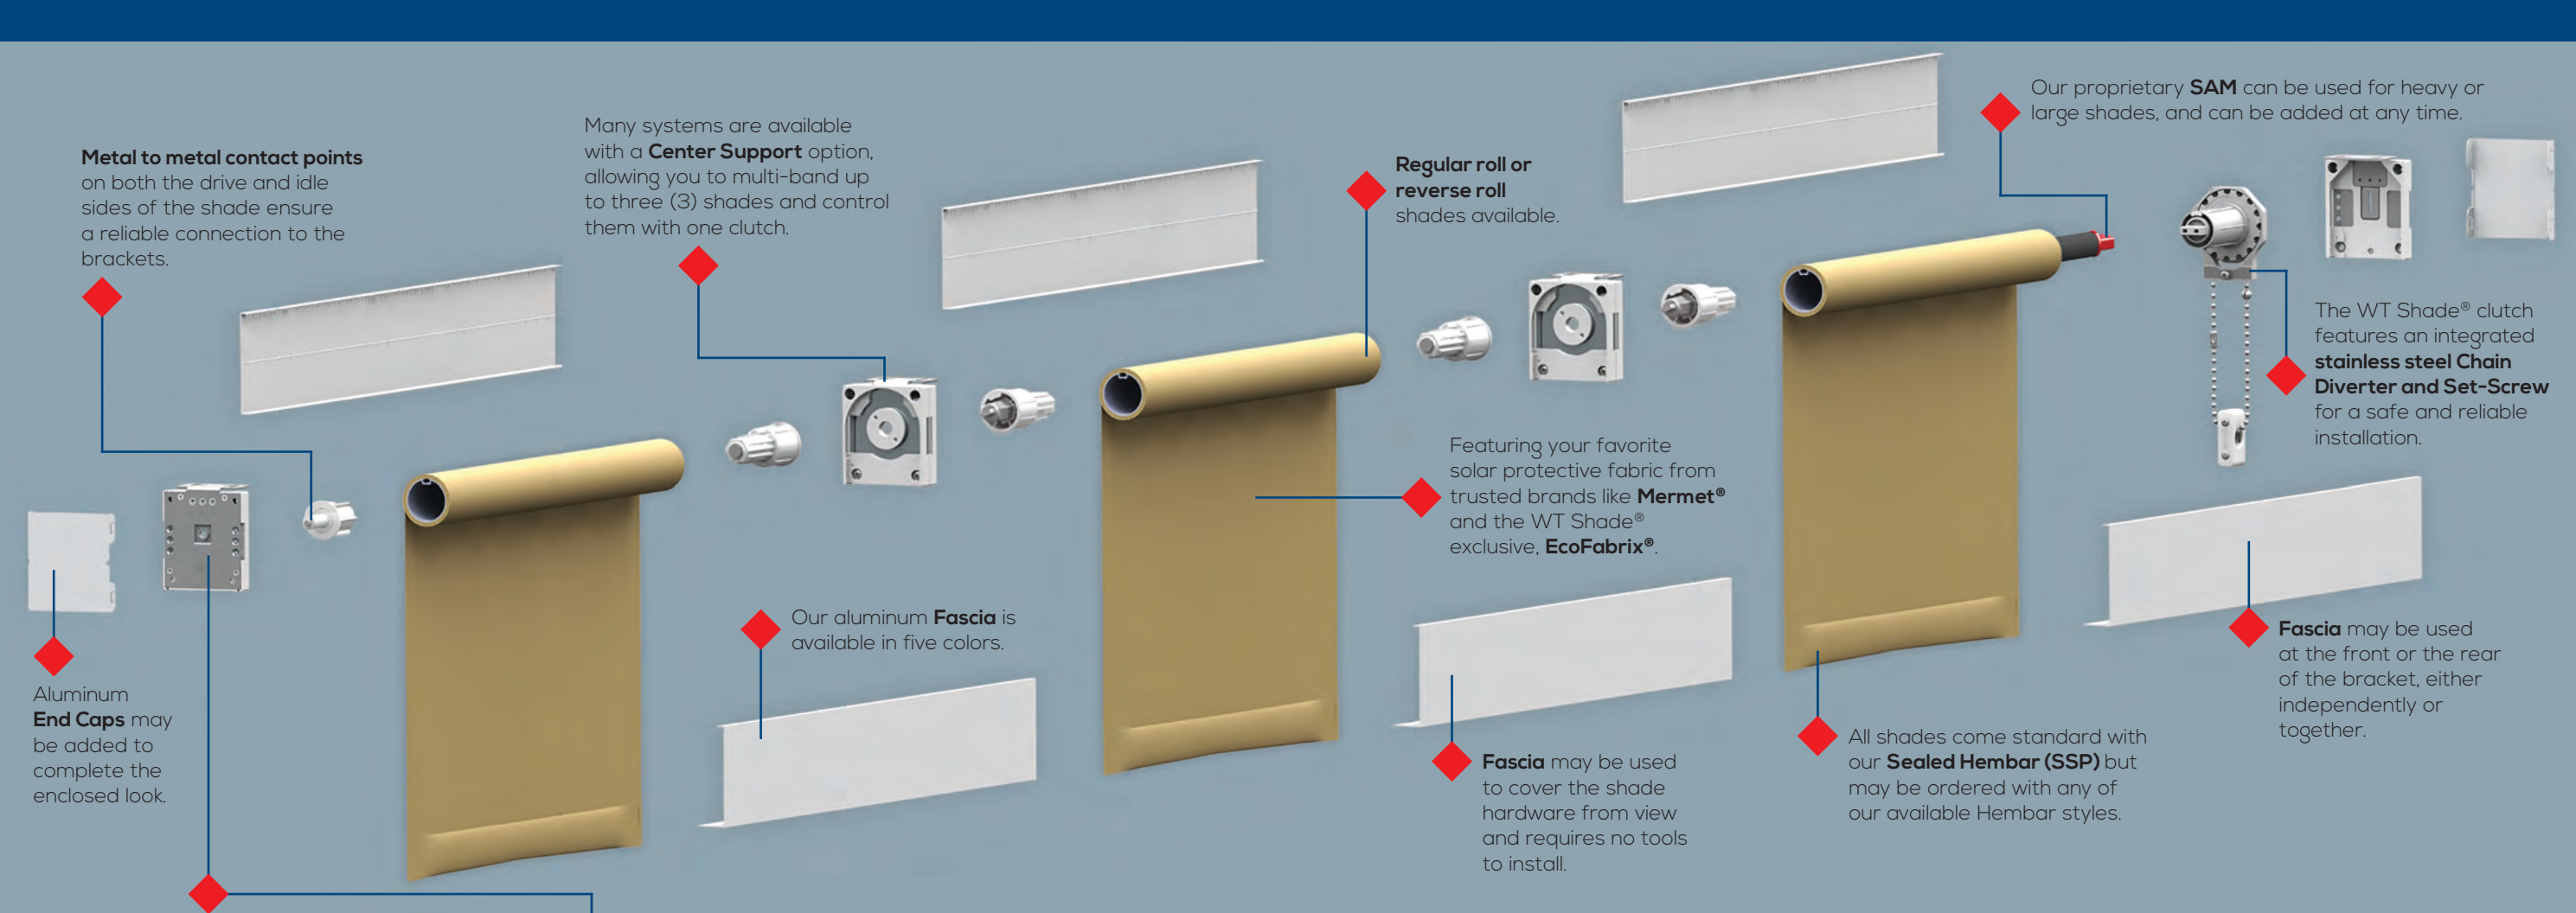

HeliaRISE® is designed using The SoloMount Bracket® System. For the dealer and installer, this means that HeliaRISE delivers a level of adaptability and mounting flexibility that makes it fast, efficient, and easy to install. SoloMount Brackets are compatible with Fascia and yet are equally beautiful without. Furthermore, SoloMount Brackets enable Fascia to be added at any time, so installations can adapt to a designer's future ideas instantly and with finesse. With this powerful combination, completing jobs to the customer's total satisfaction has never been easier.

HeliaRISE® is a product of extensive field research and collaboration. Its innovative, multipurpose design proves an invaluable problem-solver on the job site for any number of installation surprises and challenges. This unique flexibility spans the full line of HeliaRISE products, and allows installers to achieve more each day by increasing productivity and reducing costs, regardless of the size of the job.

VALUE FOR THE CUSTOMER

Whether in single, double, or even multi-banded versions, HeliaRISE® is a window shading system with which end-users will fall in love. A vast array of colors, sizes, accessory options, and fabrics allow for an endless combination of design choices to fit virtually any aesthetic or design challenge. Not only will HeliaRISE installations look perfect in their space, but when combined with our proprietary Spring Assist Mechanism (SAM), your customers will be amazed and delighted by how smooth and easy these systems are to operate. Many of the compatible accessories can even be added later, allowing for customization throughout the years which is essential, since HeliaRISE is covered by the Diamond Standard: WT Shade® Limited Lifetime Warranty.

THE SoloMount BRACKET®

One bracket... So many possibilities.

- Capable of mounting in any position, this innovative bracket series allows for on-the-fly adjustments for unexpected installation conditions.
- Designed to accept front and rear fascia which can be added at any time.
- Piggyback style SoloMount Brackets allow two separate layers of shades to be hung from one bracket and still operate independently.

♦ Patent-pending

HELIARISE® FEATURES:

- HeliaRISE® Systems are available in 3 different sizes, allowing you to choose the right amount of strength necessary for your shade project.
- HeliaRISE® Systems are also available with low profile Slim Brackets intended for tight space installations that do not require the use of Fascia.
- The optional Spring Assist Mechanism (SAM) may be added to any H200 or H300 systems, making shade operation up to 50% easier for the end user.
- HeliaRISE® clutches, idlers, and center support hardware components are available in White or Black, and will be color coordinated based on your selected fabric color.
- WT Shade® offers multiple options and accessories for you to customize your shades including various Hembar styles and add-on accessories like Side or Sill Channels.
- HeliaRISE® is a companion to our MotoRISE®, BottomRISE™, and AeRISE™ shading systems, allowing you to provide a combination of solutions throughout your project with a uniform look.

For further information about each of these systems, such as Construction Documents, Data Sheets and more visit WTShade.com.

THE WT SHADE® MISSION

We supply window coverings that provide natural lighting solutions that are innovative and superior in quality. We strive to provide our customers and end users with informed service that is responsive, respectful and resourceful. We will continue to improve and evolve with market trends for the purpose of providing complete customer satisfaction.

NATURAL LIGHT MADE RIGHT®

The HeliaRISE® manual window shading system is an exclusive product of WT Shade®. For more than 40 years, we have created exceptional shading solutions, engineered for hassle-free performance worldwide.
